## Baby Raptor Cup Turner

Thank you for purchasing the patented Cup-A-Saurus® Baby Raptor single cup turner by Krafty Kow! It only takes a few minutes to be up and running!

### **What's Included:**

Baby Raptor Single Turner with Drying Stand

1 Set Legs and screw packet

2 ¾" pvc arms

1 6x4 Foam-Tastic

1 6x3 Foam-Tastic

### **Attaching the Legs:**

In the up-right position, position each leg. Make sure each leg is level on the table and not wobbly before inserting screws. Screw holes are pre-drilled, however, focus on the legs being solid on table. The included screws are self-taping, so if necessary, you will be able to easily make new holes.

**WORD OF CAUTION: THE LEGS AND COLOR PIECES ARE MADE OF PLASTIC AND WILL MELT. DO NOT EXPOSE TO DIRECT HEAT OF ANY KIND, SUCH AS SPACE HEATERS OR HEAT GUNS. PROLONGED EXPOSURE TO HEAT WILL MELT THE PLASTIC COMPONENTS.**

### **PVC Arms & Foam:**

Our suggested process is to attach the foam on the pvc arm and then into the cup. We've included two sizes of foam, one that's best for skinny tumblers, and one that works on most other size tumblers. As long as the foam is a tight fit, you will have a steady and secure turn. If you'd like to see our process, check out our Cup-A-Saurus YouTube channel where we have posted many methods of foam use and well as water bottles and other applications.

### **Attaching the Spindles:**

Each spindle arm is ¾" pvc that attaches to a custom adaptor on the Baby Raptor. When attaching, do not use anything but your fingers to tighten the thumb screws. Over tightening can damage the adapter and isn't necessary for the arm to stay secure.

Don't forget, we also make custom adapters that can be used with the Baby Raptor. Some of the custom adapters are: flask, margarita glass, wine bottles, hydrosport bottles, dog bowl etc. Visit our website at [cupasaurus.com](http://cupasaurus.com) or [kraftykow.com](http://kraftykow.com) to see our current products.
