

KRAFTY KOW SUPPLIES COMPANY

Sand-A-Saurus

Thank you for purchasing the Cup-A-Saurus® Sand-A-Saurus by Krafty Kow! We hope it will help you sand your tumbler with less effort and more accuracy. Sanding and prepping is one of the least favorite parts of making cups. This product will save time and help you get back to what you really love: designing!

The Sand-A-Saurus kit includes

1. Dense Foam attachment
2. Slightly smaller Foam-Tastic attachment
3. Base Station

What you need to provide

1. Power Drill
2. Sand Paper
3. Face mask

Instructions:

1. Decide what size foam you need for your cup. Foam needs to be tight in the cup so use the largest size possible.
2. Cover foam with a baggie if it will be sticking out of the cup (optional)
3. Twist foam and insert into cup
4. Take chuck off your power drill and insert attachment to drill
5. Put bearing section of the attachment onto the base
6. Use a tub, or over a sink if you plan to wet sand
7. With one hand, power the drill, with the other hand hold a piece of sandpaper and hold the cup from the bottom
8. Be sure to wear a face mask for protection from dust
